

11.3 MARKET SHARE ANALYSIS

The global microbiome sequencing services market is a fragmented market, with Charles River Laboratories (US), Eurofins Scientific (France), and BGI (China) together accounting for ~20% of the global market. Players such as CosmosID (US), Microba (Australia), QIAGEN (Germany), Microbiome Insights (Canada), BaseClear (Netherlands), CD Genomics (US), Zymo Research (US), OraSure Technologies (US), MR DNA (US), Eremid Genomic Services (US), Clinical-Microbiomics A/S (Denmark), Novogene Co., Ltd. (China), EzBiome (US), Boster Biological Technology (US), Zifo (India), omics2view.consulting GbR (Germany), and MacroGen, Inc. (South Korea) accounted for the remaining 75–80% of the total market.

FIGURE 29 MICROBIOME SEQUENCING SERVICES MARKET SHARE ANALYSIS, BY KEY PLAYER, 2022

Other players include CosmosID (US), Microba (Australia), QIAGEN (Germany), Microbiome Insights (Canada), BaseClear (Netherlands), CD Genomics (US), Zymo Research (US), OraSure Technologies (US), MR DNA (US), Eremid Genomic Services (US), Clinical-Microbiomics A/S (Denmark), Novogene Co., Ltd. (China), EzBiome (US), Boster Biological Technology (US), Zifo (India), omics2view.consulting GbR (Germany), and MacroGen, Inc. (South Korea).

TABLE 169 MICROBIOME SEQUENCING SERVICES MARKET: DEGREE OF COMPETITION

DEGREE OF COMPETITION	FRAGMENTED
Total Market Share of the Top 3 Players	~20%
Other Players	~80%
THE DEGREE OF COMPETITION IS DEFINED AS BELOW:	
Fragmented: When the top 5 players have a total market share of <25%	
Competitive: When the top 5 players have a total market share of 25–50%	
Consolidated: When the top 5 players have a total market share of >50%	

Note: Market shares of the above companies are calculated based on relevant segmental revenues generated by the companies.

Charles River Laboratories (US) is the leading player in the microbiome sequencing services market. CRL provides superior, flexible, and tailored solutions through its comprehensive portfolio of drug discovery and research models and services. The company has been focusing on organic and inorganic growth through expansions and partnerships. For instance, CRL partnered with Fios Genomics Ltd. (UK) to gain access to its bioinformatics solutions, helping CRL to develop a full spectrum of microbiome profiling/analysis services. In addition, the strong reach of CRL's microbial detection product, Accugenix, is contributing to the company's dominant position in the market.

Eurofins Scientific (France) is a leading player in the global microbiome sequencing services market. The company's strong focus on a broad range of customers, technology-enabled solutions, investments in joint ventures and partnerships, and comprehensive microbiome sequencing solutions and processes are factors contributing to the growth of the company's market share. The company provides drug discovery and development services to more than 220,000 customers, including managed care organizations (MCOs), biopharmaceutical companies, governmental agencies, physicians, hospitals and health systems, food & nutritional companies, and independent clinical laboratories.

11.4 REVENUE SHARE ANALYSIS OF TOP MARKET PLAYERS

The revenue analysis was calculated based on the performance of major players during the past few years and the current years in the microbiome sequencing services market. This gave an estimation of the overall market size, structure, and recent advancements in service technologies. Leading players, such as Charles River Laboratories (US), Eurofins Scientific (France), and BGI (China), influence the microbiome sequencing services market due to their vast services portfolios, recent acquisitions, and wide distribution & sales networks across the globe.

FIGURE 30 REVENUE SHARE ANALYSIS OF TOP PLAYERS IN MICROBIOME SEQUENCING SERVICES MARKET, 2020-2022

Notes: The segmental revenue for the top three players have been considered. The segmental share of microbiome sequencing services may vary significantly from company to company, depending on individual company portfolios.
